

DESIGN SUMMARY

DESIGN OVERVIEW

The "**Global Happiness Dashboard**" provides an interactive interface for exploring and analysing global happiness data from 2008 to 2023. The design **focuses** on delivering an intuitive and visually engaging user experience, with a clear theme of presenting insightful patterns in happiness metrics.

DESIGN PHILOSOPHY

Consistency and Clarity:

The interface maintains overall consistency with a unified color scheme and layout, ensuring ease of understanding and use.

Interactivity:

Utilizes advanced Shiny features to provide interactive controls, allowing users to explore data according to their preferences and gain meaningful insights.

Data Presentation:

Careful selection of chart types (e.g., stacked bar chart, pie chart, line charts) ensures accurate and effective communication of core data insights.

Aesthetics:

The layout is creatively designed with an attractive visual appeal. The interface balances functionality with aesthetic elements to enhance usability.

HOME PAGE

The **home** page presents a global overview of happiness, featuring a map that shows the distribution of happiness scores by country, a 2023 happiness stats summary, and a ranking of the top 10 happiest countries. Utilizing **geospatial visualization** and **color gradients**, this page offers a clear and creative layout to quickly convey global happiness trends.

SEARCH PAGE

The **search** page allows users to input a country to view detailed happiness data. It includes the highest, lowest and overall scores for 2023, a pie chart illustrating the contribution of six key factors to the total score, and line charts showing the historical trends of each factor, along with explanations for each factor. Utilizing **interactive data visualization** and **clear data presentation**, this page effectively meets users' needs for detailed country-specific happiness information, with a focus on **interactivity** and **clarity** in design.

COMPARISON PAGE

The **comparison** page allows users to select multiple countries to compare their happiness indices and factors. A box on the right displays the selected countries, and a stacked bar chart automatically shows the scores for the six factors. Utilizing **color coding** and **legend**, this page provides a clear and effective way to compare happiness performance across countries, ensuring **accuracy** and **clarity** in data presentation.

ABOUT PAGE

The **About** page displays the data and provides an option to download it for further analysis or sharing. Incorporating **data accessibility** and **user-friendly design principles**, this page ensures that users can easily access and explore the dataset.

APPENDIX

The data for this table is sourced from the [World Happiness Report 2024](https://worldhappiness.report/2024/).

World Happiness Report by Country: Contains global happiness indices and factors affecting happiness for various countries in 2023. This data is used to illustrate happiness levels and analyze the impact of different factors across countries.

World Happiness Report by Year: Includes detailed records of happiness indices for countries from 2008 to 2023. This data is used to display historical trends in happiness indices and to conduct predictive analyses.

For more details, visit the official website at <https://worldhappiness.report/data/>.
